

THE ARIZONA REPUBLICAN.

ISSUED EVERY DAY IN THE YEAR
BY

THE REPUBLICAN PUBLISHING COMPANY.

Entered at the postoffice at Phoenix, Arizona
as mail matter of the second class.

THE REPUBLICAN has its own special wire connecting its office direct with San Francisco and Chicago, and through these cities with all the great news centers of the world. Besides the Associated Press report it receives more special dispatches every day than any paper west of St. Louis, outside of San Francisco.

RATES OF SUBSCRIPTION:
Daily, per week, by carrier \$1.00

Weekly, per six months, by mail 4.00
Weekly, per year, by mail 7.50

FOR PRESIDENT IN 1892,

JAMES G. BLAINE, --- OF MAINE

SILVER, COPPER AND LEAD.

Silver was quoted yesterday at \$1.02 1/2 per ounce; copper at \$16.75 per 100 pounds, and lead at \$5.12 1/2 per 100 pounds.

With a railroad to the north Phoenix would have 15,000 people inside of two years.

Increased work in the mining districts north of Phoenix is helping to increase business of every kind.

Sampling works would be a great advantage to Phoenix, and a valuable source of revenue to the proprietors.

Again has war broken out in Central America and the indications are that all the five Republics there will soon be involved in it.

The cottonwood trees along the streets should go. The pepper, the umbrella or the ash make a fine shade tree and have none of the objectionable features of the cottonwood.

In the effort to secure honest elections California seems to have gone a step too far and adopted a system so complicated in its workings that it will have to be radically amended.

The protection idea will outlive many a tidal wave, and will land again the great party of the people safely in power in 1892. The operations of the McKinley bill will be better understood then.

The discovery of valuable mining properties in the mountains north of Phoenix continues, and this city promises at no distant day to be the supply point for one of the richest mining districts in the Southwest.

The election law should be amended as to the time of canvassing the returns. Instead of waiting for forty days they should be canvassed ten days after the election. Ten days is ample time for all returns to reach the county seat.

HENRY M. STANLEY was given the splendid reception he deserved at New York Wednesday night. Detractions always follow a man who has carved out his own fortune and reknown, as Stanley has, but all the attacks and abuse now made upon him will fall, as the world, and particularly America, will not accept them in the light of all his past achievements and patient labor.

The Tucson Star endorses the Hon. Fred G. Hughes, of Pima, for president of the Council this winter. Mr. Hughes is a man of experience in Legislative halls, and since a Democrat is to occupy the position, THE REPUBLICAN would be pleased to see Mr. Hughes have it. He would certainly fill the president's chair with credit to himself and honor to his party and to the Territory.

These truths are from Mr. Blaine's reply to Mr. Gladstone in the North American Review in January, 1890: "In no event can the growth of large fortunes be laid to the charge of the protective policy. Protection has proved a distributor of great sums of money; not an agency for amassing it in the hands of a few. The benefit of protection goes first and last to the men who earn their bread in the sweat of their faces."

THE REPUBLICAN is in receipt of Vol. 1, No. 1, of the Architectural News, a new architectural journal published at San Francisco. It starts out well, the first number being well printed, splendidly illustrated and containing a number of carefully prepared articles of great interest to architects and draughtsmen. We can see no reason why such a journal should not prosper on the Pacific Coast, and wish it all the success possible.

SAYS the San Diego Union of November 11: "The speech of John M. Thurston, yesterday, wherein he declared that the result of the election means Blaine or Alger for President in 1892, will find a response all over this broad land. James G. Blaine is closer today to the people and possesses their confidence to a greater degree than any other living American. Mr. Blaine will never be eliminated from the list of Presidential possibilities until he sleeps with his fathers or has occupied the Executive Mansion for a term or two."

THE Pomona Progress hits the nail square on the head when it says the following, which the people of Phoenix can profit by in making use of: "What is wanted to improve a town is grit, push, vim, energy, churches, schools, academies, morality, enterprise, harmony, cordiality, cheap property, advertising a healthy location, talk about it, help to improve it, faith accompanied by good work, honest competition in business, help in all public enterprises. Remember that every dollar invested in permanent local improvement is just so much at interest. Always cheer on the men who go in for improvement, and don't endeavor to cripple their efforts."

Great boasting is indulged in by some of the Democratic press over the defeat of Major McKinley, they telling their readers in grandiloquent terms of how the champion of protection was "defeated in his own district." But they fail to tell their readers that by an infamous gerrymander of the State of Ohio by the Democratic Legislature last winter the old Eighteenth District which Major McKinley had represented in Congress for fourteen years was wiped out of existence and a new District created for the express purpose of beating him. The old District was composed of the counties of Carroll, Columbiana, Mahoning and Stark and had been running again in a District composed of the same counties his majority of 4,000 two years ago would have been increased 50 per cent. In order to try to kill off so able a man a shoestring district composed of the counties of Stark, Medina, Wayne and Holmes was created expressly for him. All these counties were heavily Democratic except Medina, and that only Republican by 300 or 400. Based upon the vote of two years ago Major McKinley had a majority of 3000 to overcome, and so popular is he that he was only defeated by less than 300 votes. Stark County, his home, which is usually Democratic, gave him a majority of 700. Medina County increased her usual majority to 1400. Wayne's 1200 Democratic majority was reduced to 390 and Holmes, one of the banner Democratic counties of the State, with usually a majority of 2030 for that ticket, gave but 1890 majority against McKinley. Thus it will be seen that Major McKinley is extremely popular at home and only the most brazen and outrageous gerrymander ever known succeeded in defeating him.

Does prohibition prohibit? We know that it does not prevent the absolute sale or use of liquor, but the most ardent Prohibitionist does not claim this. He says that it removes the open temptation from the young, that it gives them healthier places of resort, and that in a generation or two the taste for liquor will die out. This is undoubtedly true, but the other claim, that prohibition has an immediate ameliorating effect on crime, does not seem to be proved by practice. Kansas has had prohibition for ten years. She now has 573 prisoners in her penitentiary, or one for every 1830 inhabitants. Iowa has had prohibition for five years, and cares for 619 convicts, or one for every 3121 inhabitants. Nebraska has prospered under high license during the past ten years, and has only 345 prisoners in her penitentiary, or one for every 3383 inhabitants. These figures seem to confute the assertions of the advocates of prohibition. Certainly high license is growing more rapidly than prohibition.

THE REPUBLICAN would suggest that a series of public meetings be held in the course of the winter, under the auspices of the Chamber of Commerce, for the purpose of discussing matters of interest to the general public, and of suggesting municipal reforms, public improvements and the extension of the city limits. The meetings should be entirely free and be open to all. Our foremost business and professional men should take that prominent part for which their experience and intelligence specially qualify them. Politics will henceforth for a year or more be at a discount, and all that will help the progress of the city in any direction should receive wider attention.

AN English statistician says that public wealth is made up of ten items, everyone of which can be calculated to a nicety except the value of public works. Thus, land is worth thirty times the assessed annual rental valuation. Houses are worth eighteen times the rental. Furniture, according to insurance agents, is worth on an average half the value of the house. In the comparison of aggregate values arrived at by this computation our own country comes out ahead. The wealth of France is \$45,000,000,000, that of the United Kingdom \$48,000,000,000, and that of the United States \$68,000,000,000.

WANTS.
